Universal TV/VCR/Cable Remote
(Remote #Y147SB)

Let's make things better.

PHILIPS MAGNAVOX

Picture

SmartScreen™ (Contrast Enhancement Filter)

In addition to providing substantial increase in visual contrast, this SmartScreen™ lends a "direct-view look" to a large screen television and prevents serious accidental damage to the delicate front lenticular screen. It's almost like having a full-time body guard watching over your investment.

MagnaBrite™ Lenses

By moving the red, green, and blue guns closer to the view screen, more consistent edge-to-edge brightness and contrast become a reality. Add the advantage of Delta 77/78 optics and the focal length of the guns is dramatically reduced—producing crisp, well-defined large screen images and slim cabinet design.

Wideband Video Amplifier

More is definitely better. By extending the video bandwidth to 10MHz, you get up to 800 lines of horizontal resolution² for striking picture detail and an impressive increase in frequency response (through A/V inputs).

Remote Control

Universal TV/VCR/Cable Remote

Controls all features and functions of this monitor/receiver with direct menu access plus activates Smart Window™ PIP with Action Freeze, Position and Swap; and exclusive SmartSound™ and SmartPicture™ options. This remote also controls all important operating features and functions of virtually all infrared VCRs, and on/off and CHANNEL ▲ ▼ on most cable converter/decoders. (Remote #Y147SB)

Convenience

Smart Window™ (PIP)

Used in conjunction with a second video source such as a VCR, DVD Video player, or Web browser, picture-in-picture allows you to monitor one TV channel while watching another, monitor videotape or videodisc playback while playing a game, or monitor a TV channel while surfing the Internet. You can swap the main and secondary pictures, position secondary pictures in any screen corner, or freeze the main picture information and put it into the inset picture. In all cases, the main picture is provided with its corresponding audio. A size select menu function facilitates reduction of the size of the inset picture by approximately 50%.

SmartPicture™

A touch of the SMART button on the remote control provides the option of selecting one of 4 preset positions to enhance enjoyment of video games, sports, movies or weak signals. Select the desired option and all important picture elements are instantly adjusted to optimize viewing pleasure.

Advanced Help Menu

The Help Menu provides you with the option of selecting first time setup assistance; operating tips for enhancing the ultimate video/audio experience; and a special glossary to provide further explanation of each listed feature's function and its corresponding benefit.

Sound

SmartSound™

When activated, SmartSound™ keeps volume levels constant between programs and commercials, and from one channel to another. SmartSound™ constantly monitors the audio signal, reducing a signal that's too loud and increasing a signal that's too weak.

True Surround Sound

Experience the full, three-dimensional effect of a live musical performance with true surround, not just matrix surround. The front, left and right speakers contain directional sounds creating stereo spread (or what's known as the "wall of sound"), as well as other important effects that help "steer" the audio more realistically to the listener's ears. The rear speakers (not included) recreate the reflective ambience of the original room in which the audio was recorded. They generate short echoes and delays that make the entire audio experience more lifelike.

Incredible Stereo™

Pseudo-acoustic management of the audio signal produces a dramatic expansion of the "wall of sound" engulfing the listener and heightening overall home theatre entertainment.

10-Watt dbx® Hi-Fi Stereo Sound System

Bass Boost

Audio/Video Jack Panel

Audio/Video Jack Panel (GR6D-10)

The A/V jack panel on the back of this set includes 1 S-Video input for connection of high-resolution video accessories, 1 standard 75Ω antenna input, audio/video inputs for connection of a VCR, DVD Video player, Web browser, or other accessory equipment; variable audio outputs that let sound from the TV or accessories be routed through a home audio system; L/R (+/-) speaker jacks, and a menu-selectable speaker switch for choosing internal or external sound systems.

Additional Features Include:

- 160° wide-angle screen/ 550 foot lamberts peak brightness
- Delta 77/78 lenses with curved faceplate
- 7" liquid-cooled, liquid-coupled tubes
- 181-total channel capability
- Clearview video noise reduction
- Random channel access
- Programmable scan tuning
- Total remote menu-format tuning with multicolor onscreen graphics
- 4-way cursor directional control
- One-button picture reset
- Status recall
- Mono/stereo/SAP select
- Cable/normal select
- Two 4" x 6" oval speakers
